In Machines We Trust

By Jennifer Strong

A podcast about the automation of everything. Host Jennifer Strong and the team at MIT Technology Review look at what it means to entrust artificial intelligence with our most sensitive decisions. We also look to AI to read and interpret our emotions, determining whether we're happy, sad, angry, distracted, or even a threat. Tech Review's editors and reporters explore the impact of artificial intelligence on the way our future will work.

Encore : Want a job ? The AI will see you now

1

In the past, hiring decisions were made by people. Today, some key decisions that lead to whether someone gets a job or not are made by algorithms. The use of AI-based job interviews has increased since the pandemic. As demand increases, so too do questions about

Seeing double : AI births digital humans

2

Digital twins of humans capture the physical look and expressions of real humans. Increasingly these replicas are showing up in the entertainment industry and beyond and it gives rise to some interesting opportunities as well as thorny questions. We speak to: Greg
